

## **EPS/R2 SMART FLEX PRESSURE PLATE RESISTIVE WIFI – BATTERY**

More INNOVATIVE, UNIQUE, THIN and extremely FLEXIBLE version of the new SMART EPS/R2 resistive baropodometric platform, with WIFI connection and powered by BATTERY.

The FLEX version of the EPS/R2 allows easy transport being completely rolled up and weighing less than 1 kg!

Its easily interfaceable through the new BIOMECH App (available for IOS & Andorid tablets) and allows rapid test execution both in STATIC and DYNAMIC.

Once the evaluation is completed, it is possible to have a quick summary of the main data directly on the tablet, while for a more detailed evaluation it is possible to access the protected area of the Biomech WEB LAB CLOUD to compare graphs, analyzes and print the relative reports for patients.

Static and dynamic parameters identical to those of EPS/R2.

Weight less than 1 kg and dimensions similar to the EPS/R2 but with a thickness of 1 MILLIMETER!

Rigid modular base on which to place the EPSR2 FLEX available on request.
